

# Forex Profit System's Review

By: **Stephen Heng**  
*Forex Trader, Hongkong*

The Forex Profit System @ profitguideforex.com is really a perfect combination of chart patterns and technical indicators. There are many trading systems in the market, but most of them are mechanical and solely are based on combinations of technical indicators. In Forex Profit System, David Chia has taken trading methodologies to next level by using a combination of charts, candlestick patterns and technical indicators. Besides, as a deal of the package, he gave an offer that if traders can not make profit as what he promised within 8 weeks, they can get their money back. It is a real deal.

Forex Profit System identifies the buy/sell signal not solely based on technical indicators, but based on 3 effective yet very simple steps which involve selective chart, candlestick patterns and technical indicators. It is just like counting 1-2-3 to make buy/sell decisions. David also describes briefly the entry and exit strategies and the reasons behind the setups. The concepts, indicators and signals are explained briefly and clearly with illustrators. Even if the user is just a newbie in trading, he can easily understand every necessary technical knowledge by following the introduction section.

In general, the system is suitable for many types of traders (newbie/pro, swing/intraday/position). Also equipped with advanced money management strategies, defense/attack strategies, the system is a complete guide to make huge profit in trading forex. Just follow instructions inside the system and believe that you can beat the market.
